ESS Extreme Performance

The Firestrike goggle can be fit to any Pacific bushfire helmet currently in the field using the supplied instructions, or pre-fit to new helmets at the Pacific factory.

- Low profile design offers an exceptionally broad field of view.
- Fire resistant frame, lens and straps are compliant to AS/NZ1337.
- A two-piece strap system with a 2.5cm wide woven strap and patented Speed Clips™ provide a secure fit and allow easy, quick adjustment with or without gloves. Traditional one-piece strap also available.
- ESS eyewear features modular technology that allows all lenses and straps to be quickly and inexpensively interchanged. Tear-off lenses, High-Def Yellow and Smoke Gray coloured replacement lenses available.
- Extra thick 2.4mm polycarbonate lenses have ClearZone FC™ anti-fog and anti-scratch lens coatings, distortion-free optical clarity, and provide 100% UVA/UVB protection.
- Lenses are highly impact resistant, and exceed the U.S. Military's .22 caliber ballistic impact test MIL-V-4351 I.C.
- Fully filtered perimeter vents dramatically reduce fogging, keep airborne particles and smoke out, and repel liquid and splashes.
- Rx inserts available, which are easily fit by your optometrist and then snap inside the goggle frame.

Firestrike goggle mounted to helmet

Attachment posts

Rx Insert

The Firestrike goggle mounting system is revolutionary. The attachment post positioned under the brim ensure a natural strap angle. This innovative helmet-goggle integration is far more comfortable than traditional goggles, and--unlike conventional straps--won't push the helmet up off the head.
